

# Green Footprint Community

*Cultivating a Sustainable Future Together Local Action and Global Impact*

## About Us

The **Green Footprint Community** is an impact-based community created within the *Green Me Green Footprints* Erasmus+ project. It brings together not only project participants, but also students, teachers, school staff, families, friends, and local communities influenced by the project's activities and values.

- Anyone who interacted with the project or adopted sustainable habits through it is a natural part of this community. The Green Footprint Community continues to grow beyond the project's official duration through everyday awareness and action.

# Samsun Meeting

During the **Samsun meeting**, students collected small stones and sea shells from the beach and reused them to design a symbolic community badge.

Inspired by a **windmill**, the badge represents **renewable energy**, **sustainability**, and continuous movement.

The use of sea shells highlights respect for **marine ecosystems** and coastal protection.

This hands-on activity encouraged creativity, teamwork, and environmental responsibility.

# Student Voices

- **Bilge Su**  
**(Türkiye)**  
“I learned  
that even  
small  
stones can  
carry big  
meanings.  
”

- **Ginevra**  
**(Italy)**  
“Sustainab  
ility starts  
with  
simple  
actions.”

- **Saulius (Lithuania)**

“Sustainability is something we can build with our hands.”

- **Afrodite (Greece)**

“The windmill shape made me think about clean energy.”

- **Ertuğrul (Türkiye)**

“Using natural materials made me feel more responsible for the environment.”

- **Thomas (Italy)**

“Protecting nature is something we do together.”

**Giannis (Greece)**

“Our badge represents respect for nature.”

**Melissa (Italy)**

“I see waste differently after this activity.”
